# Dal-Keystone

Unglazed impervious porcelain ceramic mosaics provide form and function unsurpassed by any comparable products. Commercial swimming pools afford the opportunity to custom design decks, wall and pool areas that are not only striking in appearance, but have low maintenance and lasting durability. These pools have a high usage factor that are subject to extremes with constant soaking, body oils and purifying chemicals. Devasting to most materials, these merely become good reasons for specifying Dal-Keystone porcelain ceramic mosaics. Dal-Keystone's complete line of trim shapes for both conventional and surface installation permit unlimited design versatility. A variety of configurations can be designed with readily available trim as illustrated.
