Blue 1x1 1/2 surface bullnose

Red 1x2 surface bullnose

Red 1x1 surface bullnose

Brown 1x1 surface bullnose

Blue 1x1 surface bullnose

To help you visualize your pool waterline, we have photographed 6" high tiles. This is the height of tile that is installed on standard pools and spas. However, pools with raised bond beams will have the added beauty of additional rows of tile. All tiles are displayed in the same scale (approx. 1 1/8" = 6"). Variations in shade are inherent in all kiln-fired clay products

- All our tiles are acid proof.
- All tiles in this brochure are frost proof except those marked with an nf.
- All tiles smaller than 6" x 6" are mesh mounted.

BLUES ranging from pastels to midnight blues will always remain the classic color for pools.

EARTHTONES of gold and brown bring the peaceful tranquility of nature into your pool setting.

REDS enhance the extensive use of brick in today's yards.

WHITES for that clean and sparkling look.

BLACKS go great with black plaster and are perfect for racing lanes.

PRINT AND DECORATIVE TILES have found a permanent home on swimming pools because they help to camouflage the white alkali build-up caused by hard water.

PICTURE FRAME YOUR POOL WITH COPING FOR SAFETY AND DESIGN

Let's get back to practical as well as beautiful and functional. Coping is the finest product that can be installed around a pool. The smooth rounded edge makes it ever so comfortable to sit on with bare legs and avoids tearing expensive bathing suits on rough, sharp edges. Coping is the safest thing you can install because it gives both children and adults a handgrip to grab onto when in the pool. It is also easier and more comfortable to pull oneself out of the pool over coping. Coping makes cleaning your pool easier since it allows for cleaning your decks without washing debris into the pool water.

There are far fewer problems when coping is installed instead of cantilever decks. This is because the pool can be isolated from moving and expanding decks through the use of a proper expansion joint. Our cantilever coping was designed to give the cantilever look, without the deck movement problem's that often occur.

CONCRETE PRODUCTS AVAILABLE

1. Conventional bullnose style coping
 2. Flat cantilever style coping
 3. Bullnose brick style coping
 4. Flat concrete bricks to match above coping (Not Shown)
 5. Skimmer lids, 10"x15", to match above coping Custom Sizes made on request
 6. Slotted trench covers or drain covers
 7. Equipment slabs, approx. 2'x2'. (Not Shown)
- Coping stones are available to fit any shape pool.
Coping is available in a multitude of colors to coordinate with your own individual backyard color scheme.
Custom Precasting Available

The contour shape of our coping makes it the perfect product to use for outdoor seating. Install it on the top of low planter walls and low tree well walls, turning them into very comfortable and useful benches.

ELEGANCE AND DURABILITY are yours when you completely tile your spa. Not only does the tile provide beauty, but it offers a permanent lasting finish at a very reasonable cost.
