Tip: most people don't know it, but all pools, spas and floors can be retiled. And it's not uncommon to have it done. Why retile? Perhaps your tastes have changed. Or you purchased a pool or spa with tile selected by someone else. Either way, retiling is the perfect way to color coordinate your landscape and home. It's a routine procedure. So, if you find a new tile series or pattern that's more attractive, don't be afraid to make a change.

Star Mist

A daisy captured inside a diamond is the centerpiece of our new **Star Mist** line. It's surrounded by a symmetrical pattern of rich color that emulates handmade craft paper. Use as a "Mix & Match" pattern to create your own design.

1 Sheet = 1.02 sq. ft.

An exciting and unique tile, the **Antiquity** line is made of tumbled porcelain. The tumbling process creates a rough and chipped edge for an authentic "old-world" feel. This distinctive tile will certainly add character to any pool or spa. 4 pcs. = 1.0 sq. ft. nominal

Sandy points. Rocky cliffs. Copper canyons. Our new **Earthworks** and

Imola lines conjure up thoughts of the most picturesque landscapes.

These tiles combine lush colors with a rich texture. Their rough finish adds an element of safety as well.

Mix & Match

The *Discovery Accent* (on page 16B) and *Discovery Field* (on page 16) tile colors shown on these two pages are color coordinated with the *Discovery* tiles (on page 16C) for one reason – they have been designed for what is known as “*Mix & Match*.” This allows you to create any number of striking variations in your tile design, all the while maintaining a harmonious color scheme. So, there’s no limit to your imagination and personal expression with this select series of fully coordinated “*Mix & Match*” tiles.

Tip: the shade of tiles may vary within any given color. It is important to visually check the actual shade of the tile before installation for two reasons:

- 1) all tiles are subject to color variations due to slight changes in firing temperature, lot size, variables in glaze thickness and position of the tile in the kiln. Actually, it's these anomalies that give our pool and spa tiles their remarkable beauty
- 2) although we strive to depict tile colors accurately in this brochure, the limits of offset printing may cause some shifts in color when compared to the actual tile

The subtle blending of soft colors
and multi-patterned designs of
our **Tempe** line create a distinctive
3-dimensional appearance. The tiles
delicately colored design is further
enhanced by an accent border
at the top and bottom.
